(54) WATER BOAT

(57) Abstract:

PURPOSE: To provide a water boat of a long service life which is hardly deformed.

CONSTITUTION: In a wafer boat in which a plurality of grooves are formed on supporting members and plural semiconductor wafers are placed on the grooves, the supporting members 15 are integrally formed, their cross-sections have two opposing recessed parts, the substantial minimum radius of curvature is 0.5mm or more, and the minimum distance D1 between the opposing recessed parts 17 of cross-sections of the supporting members 15 is 5 to 50% of the substantial maximum radius D2.
